

MANOJ PAL

NETWORK SUPPORT ENGINEER | IT INFRASTRUCTURE

+91 6386033849 | manojpal.connect@gmail.com | Gurugram, India

PROFESSIONAL SUMMARY

IT Support professional with approximately 1 year of experience supporting IT infrastructure, network-connected systems and operational technology environments. Hands-on exposure to LAN connectivity troubleshooting, device monitoring, incident reporting and coordination with SI/vendor teams. Knowledge of TCP/IP, IPv4/IPv6, subnetting, VLANs, routing, switching, DNS, DHCP, NAT, ARP and ICMP, supported by Cisco Packet Tracer lab practice. Seeking an L1 Network Support / Network Engineer role.

CORE TECHNICAL SKILLS

Networking	TCP/IP, OSI Model, IPv4/IPv6, LAN/WAN, subnetting, CIDR, DHCP, DNS, NAT, ARP, ICMP
Routing & Switching	Cisco Routers/Switches, VLANs, access/trunk ports, trunking, static routing, basic OSPF, STP, inter-VLAN routing
Troubleshooting	Ping, tracer/tracepath, ipconfig, nslookup, arp, netstat, IP conflicts, DNS/DHCP issues, latency and packet loss
Infrastructure	Windows troubleshooting, network device support, hardware troubleshooting, remote support, basic server/network monitoring
Security	Basic firewall concepts, ACL fundamentals, VPN fundamentals, port-security concepts
Tools	Cisco Packet Tracer, Wireshark, PuTTY, Windows CMD, PowerShell, VirtualBox/VMware

PROFESSIONAL EXPERIENCE

IT Support Engineer / Network Support – RRG Group | Approximately 1 year

- Monitored and supported network connectivity for control-room systems and network-connected equipment.
- Troubleshot LAN, internet-connectivity, slow-network and device-communication issues.
- Performed first-level network and system checks using ping, IP configuration, connectivity tests and Windows troubleshooting commands.
- Monitored system/device availability and reported faults for timely resolution.
- Prepared operational and incident reports and coordinated with SI/vendor teams for network and equipment issues.
- Supported day-to-day IT operations including hardware, software and user-level troubleshooting.

NETWORKING LAB / PRACTICAL PROJECTS

- **Cisco Packet Tracer – Routing & Switching Lab:** Practiced router/switch configuration, VLANs, trunking, inter-VLAN routing and static routing.
- **IP Addressing & Network Services Lab:** Practiced IPv4 addressing, subnetting, DHCP and DNS concepts.
- **Routing & Troubleshooting Lab:** Practiced basic OSPF and diagnosed connectivity using ping, traceroute, ARP and related commands.

EDUCATION

Bachelor of Computer Applications (BCA)

Makhanlal Chaturvedi National University of Journalism and Communication, Bhopal | 2021–2024

CERTIFICATIONS / PROFESSIONAL LEARNING

- CCNA – Networking studies / preparation
- AWS Networking / Cloud fundamentals – learning
- Network troubleshooting and Cisco routing & switching – hands-on practice

ADDITIONAL INFORMATION

Target Roles: Network Support Engineer | L1 Network Engineer | IT Infrastructure Support | NOC / Network Operations Support

Location: Gurugram, India | **Availability:** As per notice period
